

HOLME-NEXT-THE-SEA

NEIGHBOURHOOD PLAN 2016-2036

QUESTIONNAIRE SURVEY RESULTS: ALL RESPONDENTS

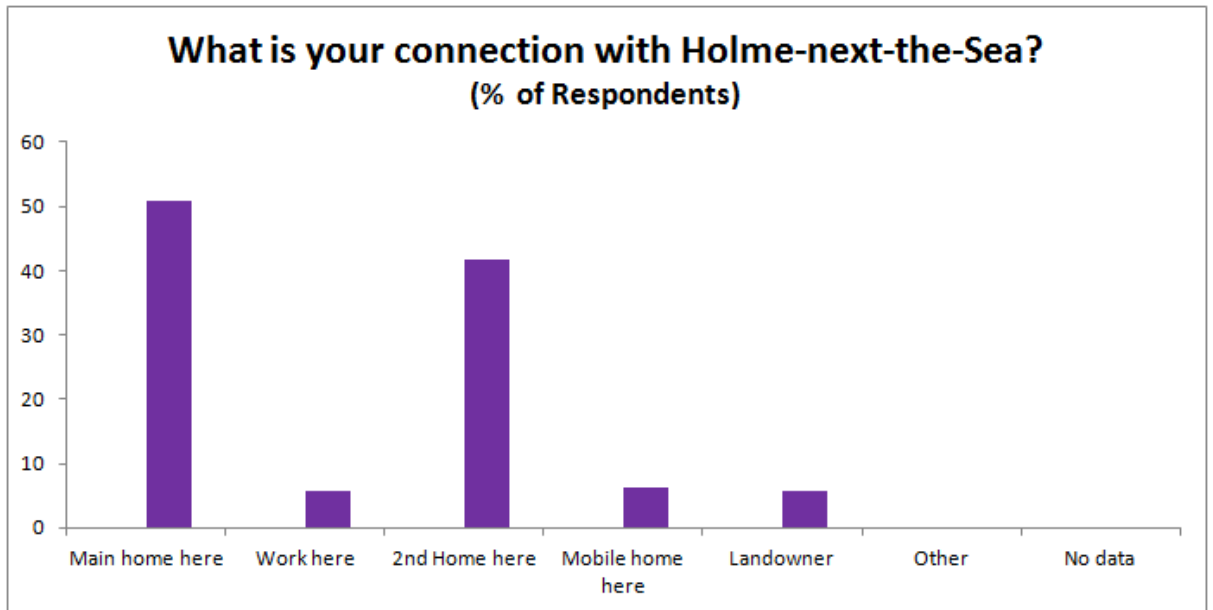

Note on the results of the May 2016 survey

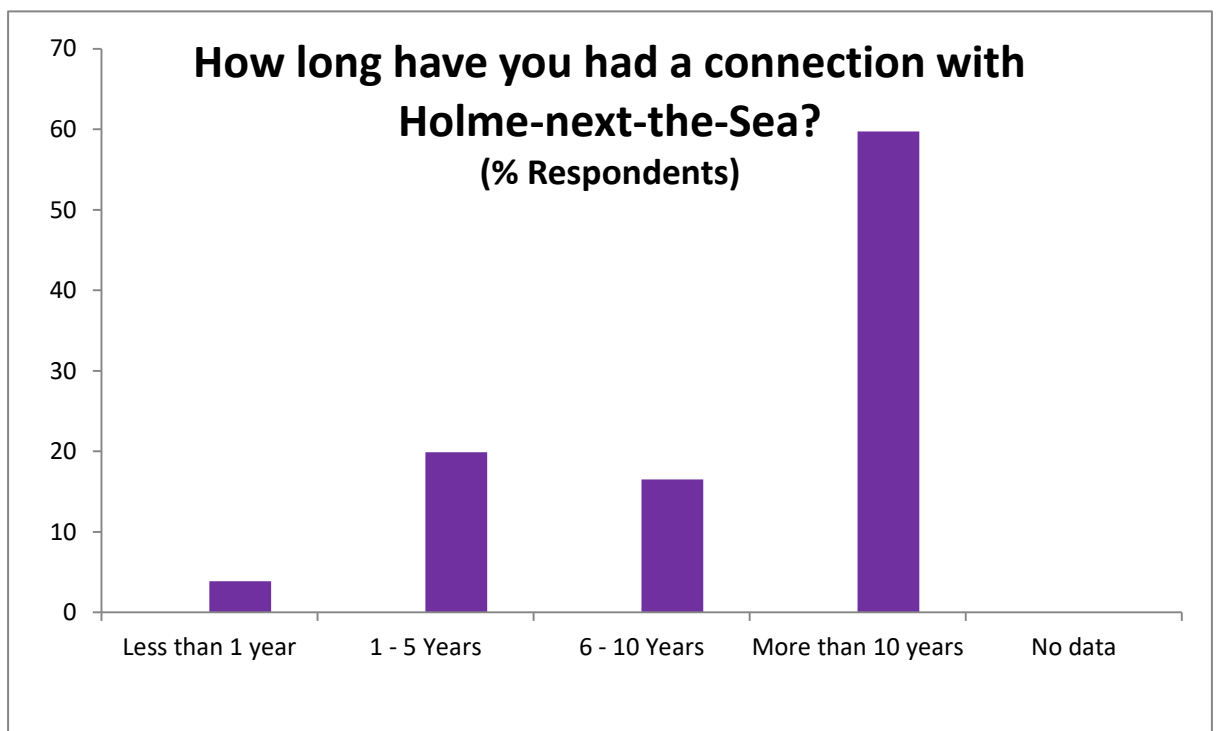

- Around 500 questionnaires were delivered to houses, mobile home sites and landowners/developers known to be connected with the Parish. 206 completed survey forms were returned – an excellent response rate of more than 40%.
- The graphs summarise results from the quantitative analysis. They follow the format of the original survey with each graph preceded by the question on which it is based. All bar charts are based on the total number of replies received (ie *206 respondents*).
- Most questions returned a good response (consistency and validation checks show on average less than 3.5% miscoded or missing values), although in Q5.2 and Q5.3 there appears to have been some confusion regarding the use of the bus.
- The overall pattern of results is indicative of strongly held views and the charts show high levels of agreement on most issues. The response to the questionnaire was very similar for both residents and second homeowners.
- More detailed work is being undertaken and qualitative analysis of the many comments and suggestions entered on individual questionnaires will be carried out as an additional task.
- Meanwhile these results are encouraging. They send out a clear message and provide a very positive basis on which to proceed with the Neighbourhood Plan.
